

TanksDirect

“first choice”

PROJECT INFORMATION SHEET

Project: Sera Care Life Sciences
Frederick, MD

Project Description Tanks Direct replaced a temporary fuel supply/return system by providing new fuel lines connecting an 8,000 gallon diesel tank and adding a 10 gallon day tank to provide overfill protection to an existing electric generator system. The three (3) existing generators required new vent lines and are now disconnected from the temporary fuel delivery/return system. The 8,000 gallon tank is monitored by a Veeder Root system.
