

TanksDirect

“first choice”

PROJECT INFORMATION SHEET

Owner: General Services Administration
FBI Headquarters - Washington, DC

Project Description: Tanks Direct was contracted to provide a fuel oil tank replacement and upgrade for the emergency generator back up power system, four (4) new day tanks, an upgrade to two (2) existing day tank systems as well as over 1500 feet of new fuel oil piping. Tanks Direct was also responsible for the removal of the existing underground storage tank as well as all control, power, communication conduit and wire.

Highlights of the project include:

- Installation of a 25,000 gallon double wall ACT100U underground fuel oil tank with an ASME pressure vessel rating
- Coordination and removal of portions of the parking ramp in order to place the underground storage tank in the basement of an existing building
- Electronic Simplex remote fuel fill station
- New tank monitoring system w/ leak detection integrated into the Building Management System (BMS)
