

TanksDirect

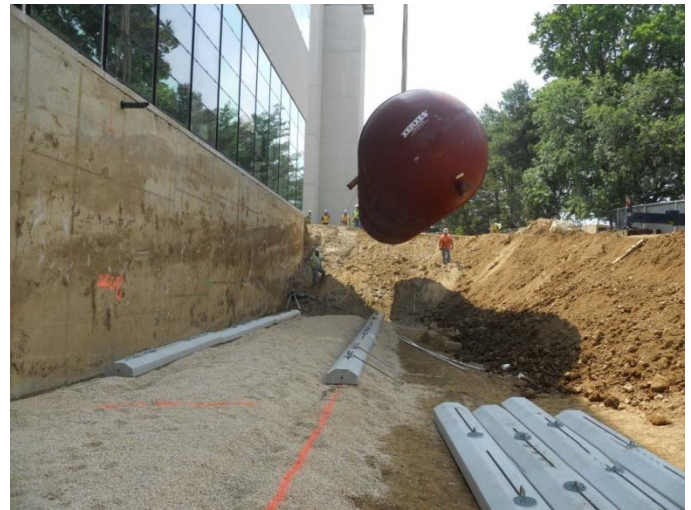

“first choice”

PROJECT INFORMATION SHEET

Project: National Naval Medical Center – Warrior Transition Unit
Bethesda, MD

Project Description: As a portion of the Rainwater Harvesting System, Tanks Direct provided three (3) 25,000 gallon single-wall fiberglass storage tanks. Two (as shown) were installed at Building 62 and the third was installed at Building 17. These tanks will be used to collect rainwater which will be pumped into the building for disinfection and subsequent use as “grey water” that can be used to flush toilets in the facility.
