

TanksDirect

“first choice”

PROJECT INFORMATION SHEET

Owner: Architect of the Capitol
Washington, DC

Project Description:

Tanks Direct was contracted to design, supply and install a new underground E-85 fuel storage tank and dispensing system as well as repairs associated with an existing diesel fuel dispensing system.

Highlights of the project included:

- Engineered project drawings and specifications
- 10,000 gallon Xerxes underground double wall fiberglass E-85 fuel storage tank
- Two (2) E-85 fuel dispensers with alternative fluids dispensing accessories
- New underground transfer pumps and supply piping
- Tank level monitoring system with leak detection
- Fleet management system
- Modifications/repairs to existing dispensing system to secure code compliance
- New 550 gallon underground steel oil water separator
- Site work, concrete and asphalt as necessary to restore grade
